A Project Report on
RLB Management System

Submitted by

Name of Student

Enrollment NO.24cs031PG00020

Laxmi Gadhvi

IN PARTIAL FULFILLMENT OF THE REQUIREMENT FOR THE COMPLETION OF THE DEGREE OF

MASTER OF COMPUTER APPLICATION

TO

DEPARTMENT OF COMPUTER SCIENCE

November 2025

DEPARTMENT OF COMPUTER SCIENCE
SAURASHTRA UNIVERSITY ,RAJKOT

DECLARATION

I hereby certify that I am the sole author of this project work and that neither any part of this project work nor the whole of the project work has been submitted for a degree to any other University or Institution. I certify that, to the best of my knowledge, my project work does not infringe upon anyone's copyright nor violate any proprietary rights and that any ideas, techniques, quotations, or any other material from the work of other people included in my project document, published or otherwise, are fully acknowledged in accordance with the standard referencing practices. I declare that this is a true copy of my project work, including any final revisions, as approved by my project review committee.

Signature of Student

Laxmi Gadhvi(Enrollment NO.24cs031PG00020)

Date:

Place: Department of Computer Science, Saurashtra University

CERTIFICATE

This is to certify that the work which is being presented in the Project Report entitled “RLB Management System”, in partial fulfillment of the requirement for the completion of Master of Computer Application and submitted to the Department Of Computer Science, Saurashtra University, is an authentic record of my own work carried out during a period from NOV 2025. The matter presented in this Project Report has not been submitted by me for the award of any other degree elsewhere.

Signature of Student

Laxmi Gadhvi

(ENO.24cs031PG00020)

This is to certify that the above statement made by the student is correct to the best of my knowledge.

Head Of Department

Prof. (Dr.) Atulgiri M. Gonsai

Professor & Head,

Department Of Computer Science,

Saurashtra University, Rajkot

ACKNOWLEDGEMENT

We express our sincere gratitude to all those who have supported, guided, and encouraged us throughout the development of this project. The successful completion of this work would not have been possible without their valuable contributions.

We would like to extend our heartfelt thanks to the Department of Computer Science, Saurashtra University, Rajkot, for constant guidance, insightful suggestions, and continuous encouragement. The expertise and support provided by the department played a crucial role in shaping this project and helping us overcome challenges at every stage.

We are highly grateful to the Head of the Department, Prof. (Dr.) Atulgiri M. Gonsai, Department of Computer Science, for providing us with the opportunity to work on this project as part of the MCA curriculum. The academic environment, facilities, and timely support from the department greatly contributed to the smooth completion of our work.

We are also thankful to all the teaching staff members of the Master of Computer Application department for their assistance, motivation, and valuable advice throughout the project duration. Their continuous support has strengthened our understanding and improved the quality of our work.

Signature of Student

Laxmi Gadhvi (Enrollment NO.24cs031PG00020)

ABSTRACT

The **RLB Management System** is a desktop-based application developed to automate and streamline the operations of manpower, transportation, and heavy vehicles within an organization. The main objective of this system is to provide an efficient, reliable, and centralized solution for managing employee records, attendance, payments, vehicle scheduling, and maintenance logs.

The project is divided into three modules: Manpower, Transportation, and Heavy Vehicle Management. The Manpower module handles employee information, attendance tracking, and payment processing.

The Transportation module manages trip scheduling, vehicle assignments, and report generation for all transportation activities. The Heavy Vehicle module maintains records of vehicle types, models, maintenance schedules, and usage logs, ensuring proper monitoring and timely servicing.

The system is developed using C# as the programming language with Visual Studio 2012 as the development environment. The database is implemented using MySQL, and Crystal Reports is used for generating various operational reports. The application incorporates user authentication, role-based access control, and secure data management to ensure proper usage and data integrity.

The benefits of the RLB Management System include:

- **Automation of daily operations**, reducing manual work and errors.
- **Easy retrieval and management of employee and vehicle data.**
- **Quick generation of detailed reports** for management decision-making.
- **Improved operational efficiency** through centralized control and monitoring.

Overall, this project has provided hands-on experience in software development, database management, report generation, and system analysis, while also enhancing problem-solving skills and practical understanding of real-world organizational requirements.

CHAPTER 1 - INTRODUCTION

The RLB Management System is a desktop-based application designed to manage and streamline the operations of manpower, transportation, and heavy vehicles within an organization. The system provides a centralized platform to store, update, and retrieve information efficiently.

Objectives

- To **automate employee management**, including attendance, payment, and personal records.
- To **manage transportation operations**, including trip scheduling, vehicle assignments, and reporting.
- To **maintain heavy vehicle records**, including type, model, maintenance, and usage logs.
- To **generate automated reports** for management decision-making.
- To **reduce manual errors** and improve operational efficiency.

Problem Definition

In many organizations, the manual tracking of employees, trips, and vehicle maintenance is time-consuming, error-prone, and inefficient. Paper-based record-keeping often leads to delays in reporting, data redundancy, and difficulty in retrieving accurate information.

Motivation

The motivation behind developing the RLB Management System was to create a centralized, digital solution that improves data accuracy, saves time, and enhances the overall operational efficiency of the organization. This system also provides hands-on experience in software development, database management, and report generation, which is valuable for practical learning.

Project Title:

RLB Management System

Team Members:

Gadhvi Laxmi

Project Guide:

[Prof. Dr Atulgiri M.Gonsai

Professor & Head, Department Of Computer Science Saurashtra University]

Project Duration:

3-4 months

Development Environment:

- Language: C#
- IDE: Visual Studio 2012
- Database: MySQL
- Reporting Tool: Crystal Reports
- OS: Windows 10/11

Project Modules:

1. **Manpower Module:** Employee info, attendance, payment
2. **Transportation Module:** Trip scheduling, vehicle assignment, reports
3. **Heavy Vehicle Module:** Vehicle records, maintenance, usage logs

CHAPTER 3 - HARDWARE AND SOFTWARE REQUIREMENTS

3. Hardware Requirements

Component	Specification
Processor	Intel i3 or above
RAM	4 GB or above
Hard Disk	500 GB or above
Monitor	15-inch or above

Software Requirements

Software	Version/Description
Operating System	Windows 10/11
IDE	Visual Studio 2012
Database	MySQL
Reporting Tool	Crystal

CHAPTER 4 - REQUIREMENT SPECIFICATION

- Employee management: attendance, payment, personal records
- Transportation management: trip scheduling, vehicle assignment, report generation
- Heavy Vehicle management: vehicle records, maintenance, usage logs
- Generate automated reports for management

Non-Functional Requirement

- **Security:** Admin login with password protection
- **Reliability:** Accurate data storage and retrieval
- **Performance:** Quick response for queries and reports

User Role:

Role	Access Rights
Admin	Full access to all modules: Manpower, Transportation, Heavy Vehicle, and Reports

Problem Identification:

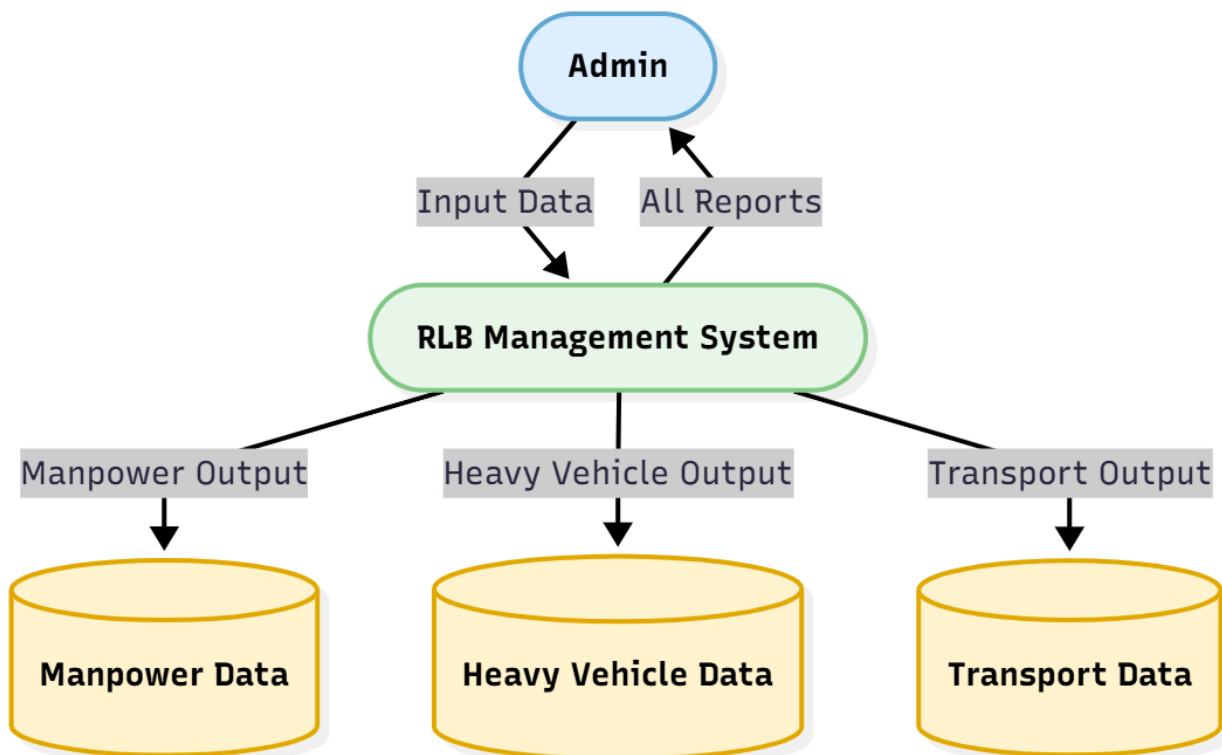

Manual tracking of employees, trips, and heavy vehicles is time-consuming, error-prone, and inefficient. Paper-based records lead to delays and difficulty in retrieving accurate information.

Feasibility Study:

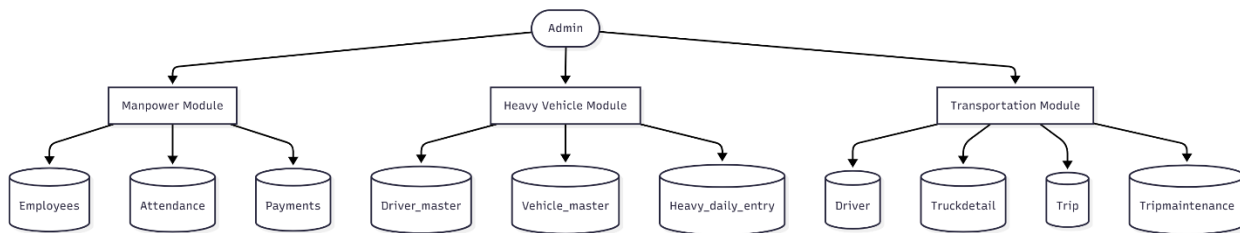

- **Technical:** Uses widely available tools (C#, MySQL, Visual Studio, Crystal Reports)
- **Operational:** Simple and easy-to-use desktop application.
- **Economic:** Cost-effective with minimal infrastructure

System Economic Cost: *(to be included in final infrastructure)*

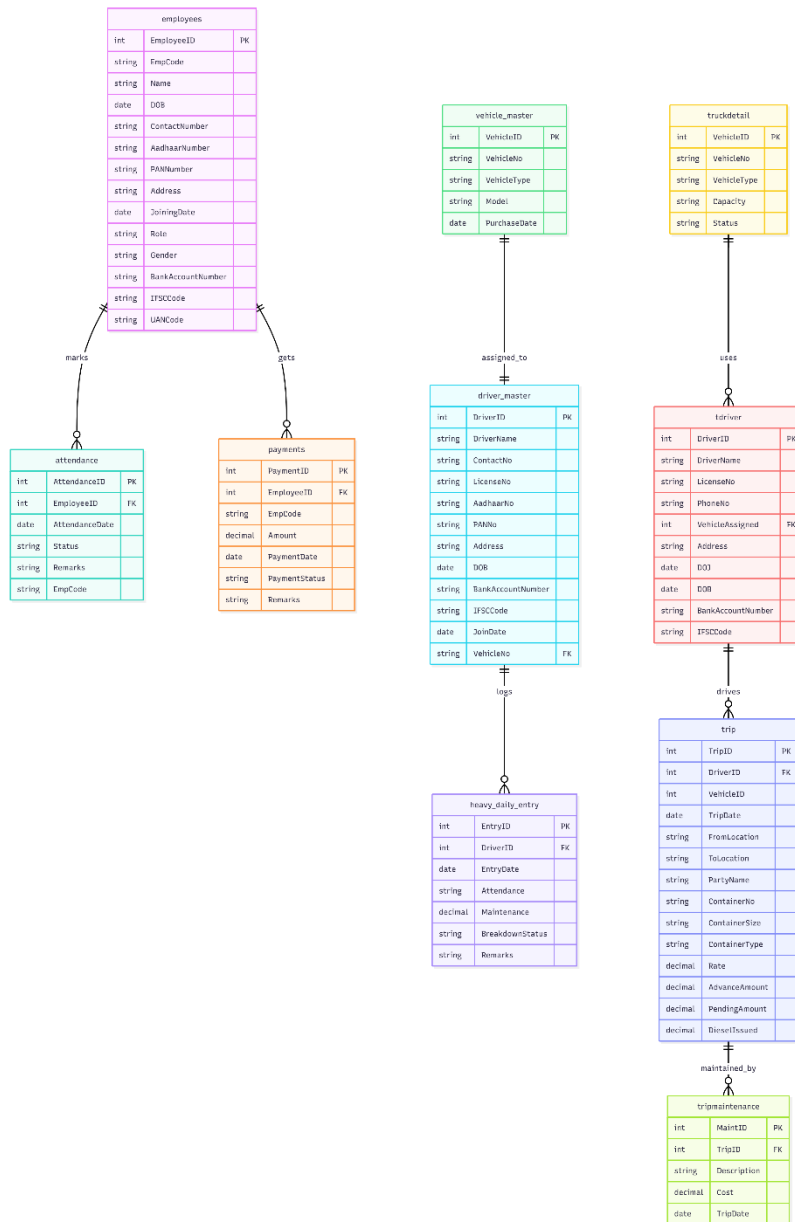

DFD: Level 0

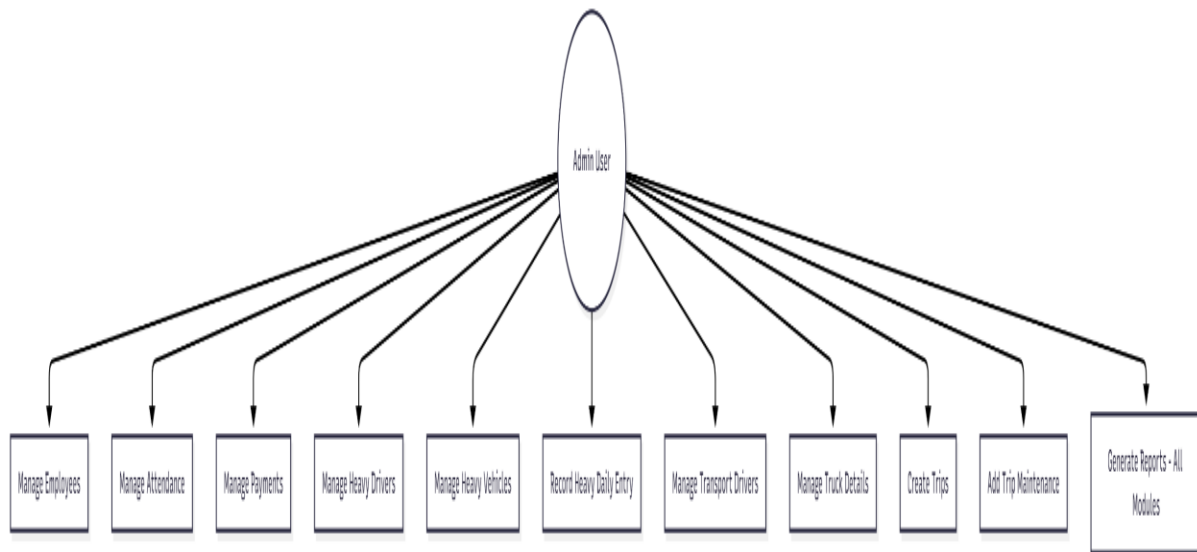

DFD level -1

CHAPTER 6 - DATABASE DESIGN / DATA DICTIONARY

MODULE 1: MANPOWER MANAGEMENT

1.Table: employees

Field	Type	Description
EmpID (PK)	int	Unique employee ID
EmpCode	varchar(20)	Employee code
Name	varchar(100)	Full name
DOB	date	Birth date
ContactNumber	varchar(15)	Contact number
Aadhaar Number	varchar(20)	Aadhaar
PAN Number	varchar(20)	PAN
Address	varchar(255)	Address
Joining Date	date	Joining Date
Role	varchar(50)	Laboure/Staff
Gender	varchar(10)	Gender
BankAccountNumber	varchar(30)	Salary account number
IFSCcode	varchar(15)	IFSC code
UANcode	varchar(20)	PF/ESI code

2. Table: attendance

Field	Type	Description
AttendanceID (PK)	Int	Attendance entry
EmployeeID (FK)	int	Linked to employees
Attendance Date	Date	date
Status	varchar(10)	Present/Absent
Remarks	varchar(255)	Notes
EmpCode	varchar(50)	Employee code

3. Table: payments

Field	Type	Description
PaymentID (PK)	int	Unique payment ID
EmployeeID (FK)	int	Employee ID
EmpCode (FK)	varchar(50)	Emp code
Amount	decimal	Salary/advance
Payment Date	date	Payment date
Payment Status	varchar(20)	Paid/Unpaid
Remarks	varchar(255)	Extra note

rlb

MODULE 2: DRIVER/HEAVY VEHICLE MANAGEMENT

4. Table: driver_master (Heavy Vehicle Drivers)

Field	Type
Driverid (PK)	int
Driver Name	varchar(100)
Contact No	varchar(15)
License No	varchar(30)
Aadhaar No	varchar(20)
PAN No	varchar(15)
Address	text
DOB	date
BankAccountNumber	varchar(20)
IFSCCode	varchar(15)
JoinDate (FK)	date
VehicleNo (FK) (vehicle_master) Vehicle number	varchar(20)

5. Table: vehicle_master (Heavy Vehicle List)

Field	Type
VehicleID (PK)	int
VehicleNo	varchar(20)
VehicleType	varchar(30)
Model	varchar(50)
PurchaseDate	date

6. Table: heavy_daily_entry

Field	Type
EntryID (PK)	int
DriverID	int
EntryDate (FK)	date
Attendance	varchar(15)
Maintenance	decimal
Breakdown status	varchar(30)
Remarks	text

MODULE 3: TRANSPORTATION

7. Table: truckdetail (Main truck)

Field	Type
VehicleID (PK)	int
VehicleNo	varchar(50)
VehicleType	varchar(50)
Capacity	varchar(50)
Status	varchar(20)

8. Table: tdriver (Trip Drivers)

Field	Type
DriverID (PK)	int
DriverName	varchar(100)
LicenseNo	varchar(50)
PhoneNo (FK)	varchar(15)
VehicleAssigned (FK)	int
Address	varchar(200)
DOJ	Date

DOB	date
BankAccountNumber	varchar(20)
IFSCCode	varchar(15)

9. Table: trip

Field	Type	Description
TripID (PK)	int	Unique trip ID
DriverID	Int	Assigned driver ID
VehicleID	Int	Vehicle (truckdetail)
TripDate	Date	Trip date
FromLocation	varchar(100)	Source
ToLocation	varchar(100)	Destination
PartyName	varchar(100)	Client
ContainerNo	varchar(50)	Container ID
ContainerSize	varchar(50)	20FT/40FT
ContainerType	varchar(50)	Dry/Cool/Reefer
Rate	decimal	Trip cost
Advance Amount	decimal	Advance
Pending Amount	decimal	Pending
Diesel Used	decimal	Liters

10. Table: trip maintenance

Field	Type	Description
MaintID (PK)	int	Maintenance ID (PK)
TripID (FK)	int	Trip reference
Description	Int	Repair details
Cost	decimal	Expense
TripDate	date	Related date

MODULE 4: SYSTEM LOGIN / USER MANAGEMENT

11. Table: login

Field	Type
ID (PK)	int
Username	varchar(10)
Password	text (encrypted)
Phone No	varchar(20)

Testing ensures every module of the RLB Management System works correctly and gives accurate results. It helps identify errors, incorrect data flow, and unexpected behavior before final deployment.

7.1 Types of Testing Used

➤ Black Box Testing

This method tests the system behavior without checking internal code.

Examples:

- Checking whether employee entry saves properly
- Verifying trip entry calculations
- Testing report generation output

➤ White Box Testing

This focuses on internal flow, conditions, and validations.

Examples:

- Required fields validation
- Input restrictions
- Error message handling

7.2 Sample Test Cases

Test Case 1: Employee Entry

- **Input:** Name, Mobile, Address
- **Expected:** Employee saved successfully
- **Result:** Pass

Test Case 2: Attendance Entry

- **Input:** Employee ID, Date, Status
- **Expected:** Attendance recorded
- **Result:** Pass

Test Case 3: Trip Entry

- **Input:** Truck, Driver, Route, Diesel
- **Expected:** Trip stored + amount calculated
- **Result:** Pass

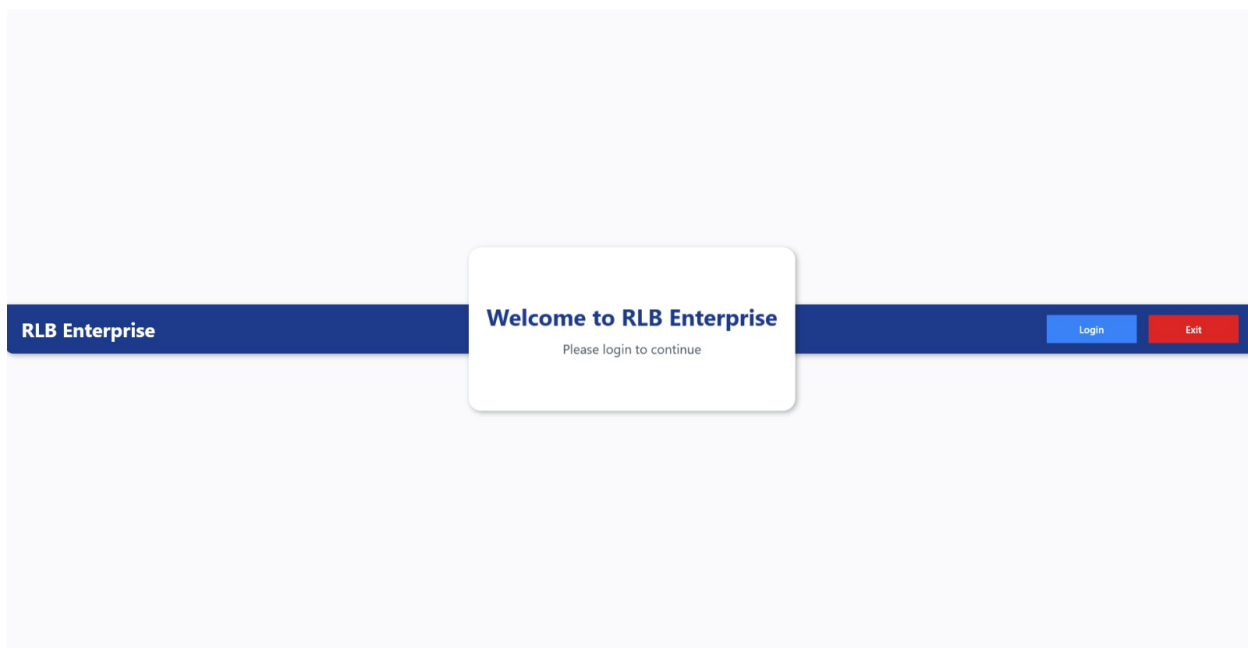

Test Case 4: Login Form

- **Input:** Valid/Invalid username & password
- **Expected:** Accept valid, reject invalid
- **Result:** Pass

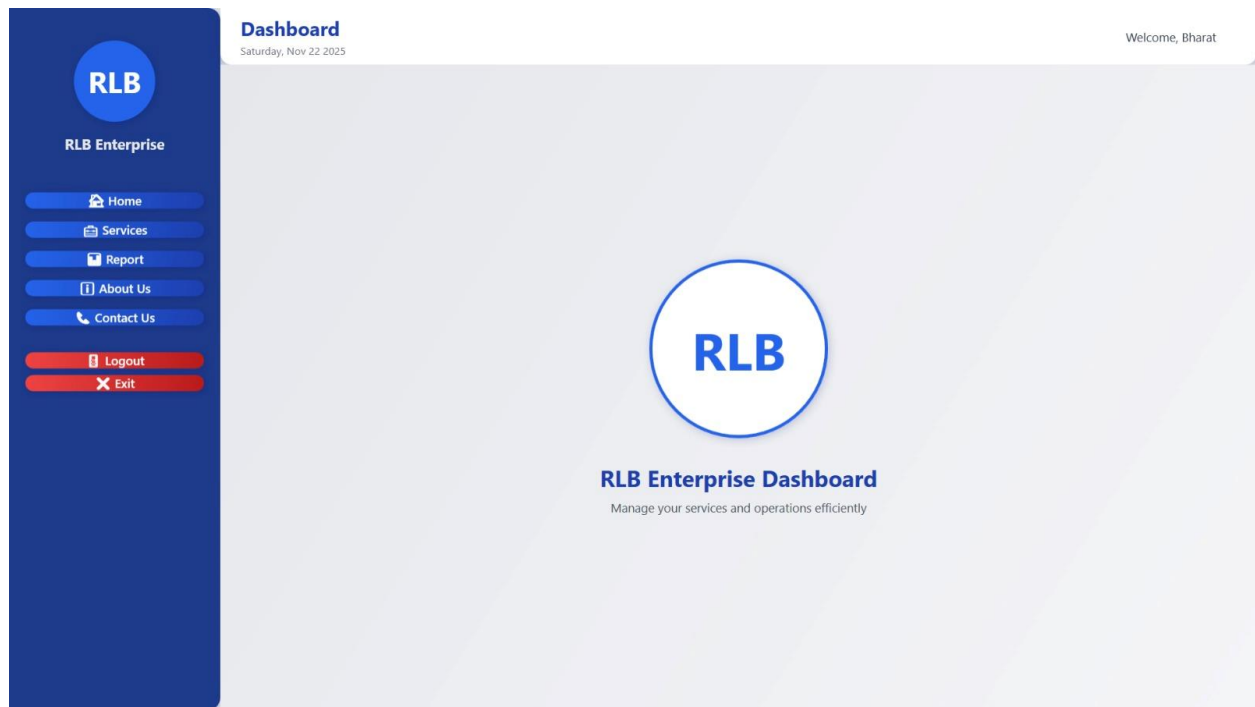

✓ The system passed all major test scenarios.

Welcome, Bharat

About R.L.B ENTERPRISE

Our Mission and Vision

Mission

To deliver exceptional services that empower our clients to achieve their operational goals while fostering long-term partnerships built on trust and excellence.

Vision

To be a leading provider of manpower and transportation solutions, setting benchmarks for quality and reliability in the industry.

Our Offered Services

- Manpower Supply – Skilled, semi-skilled, and unskilled workforce tailored for client needs.
- Transportation Services – Safe and timely delivery of goods with reliable fleet.
- Heavy Vehicle Provision – Excavators, loaders, dump trucks, and more for earthmoving operations.

Welcome, Bharat

Welcome to R.L.B ENTERPRISE

About the Company

RLB Enterprise is a trusted and dynamic organization specializing in manpower supply, transportation services, and heavy vehicle provision for earthmoving operations. With a steadfast commitment to quality, efficiency, and reliability, RLB Enterprise has established itself as a key industry player serving diverse sectors across Gujarat and beyond.

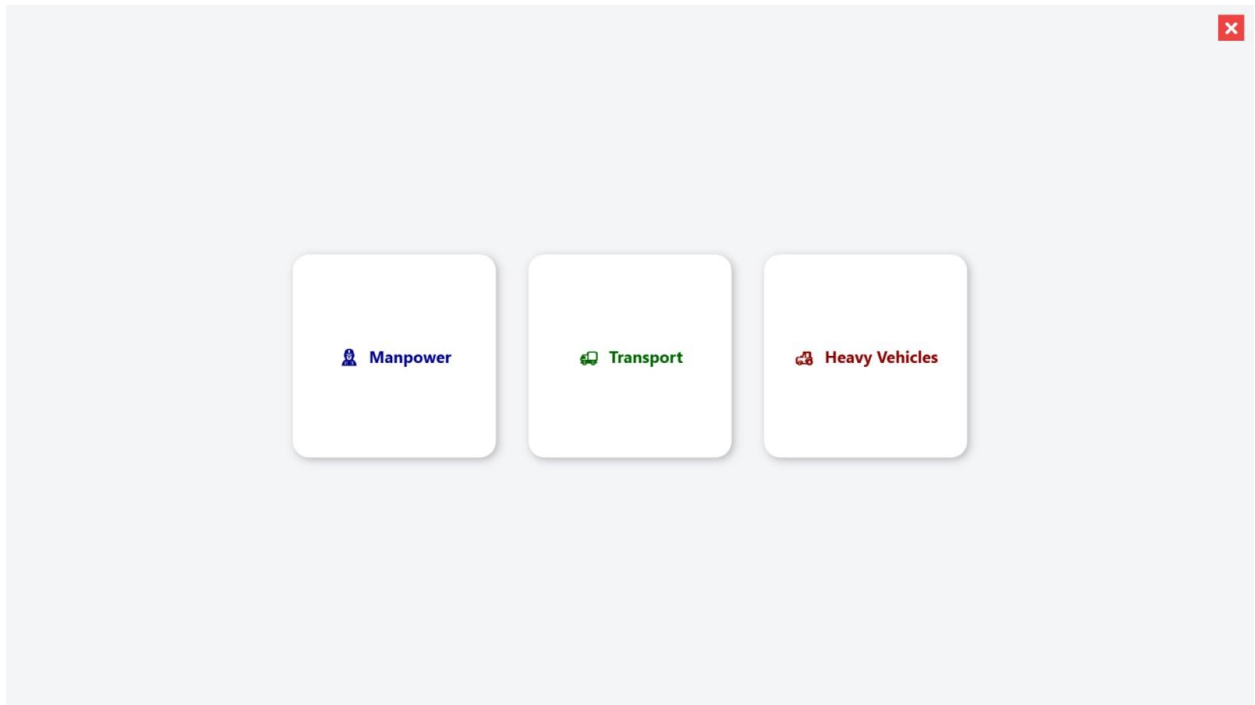

Our Core Services

- Manpower Supply – Skilled and reliable workforce for all operational needs.
- Transportation Services – Timely and secure logistics for all cargo categories.
- Earthmoving Heavy Vehicles – High-performance machinery and equipment rentals.

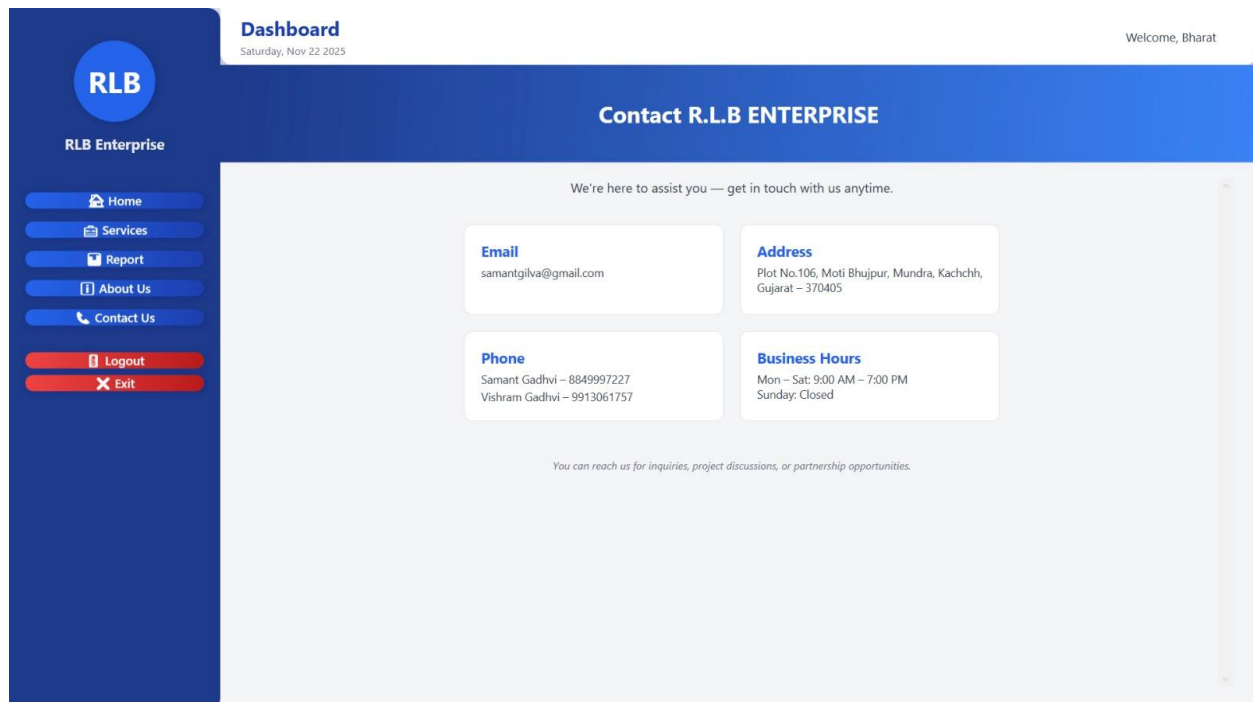

Our Vision

To become a leading enterprise that empowers industries through dependable manpower, innovative transport solutions, and a commitment to operational excellence.

The RBL Management System is divided into three major working modules. Each module handles a separate set of operations but works together under admin control.

9.1 Manpower Module

Handles all employee-related operations:

- Add and update employee details
- Record attendance daily
- Manage salary/payment entries
- Maintain employee history

9.2 Transportation Module

Manages truck and driver activities:

- Truck registration and maintenance data
- Driver information and license records
- Daily trip entries including diesel, container, and route
- Trip-based reporting

9.3 Heavy Vehicle Module

- Heavy vehicle master record
- Daily heavy vehicle work entries
- Amount and work calculation
 - ✓ All modules improve record accuracy and reduce manual workload.

The system can be expanded in the future with new features to make it more powerful and user-friendly.

Possible Enhancements

- Auto salary calculation based on attendance
 - Auto-reminder for pending trips or payments
 - Multi-user role support (Admin, Manager)
- ✓ These additions will make the system more advanced and suitable for large-scale transport companies.

CHAPTER 11 – CONCLUSION

The RBL Management System successfully digitizes manpower and transportation work that was earlier done manually. It reduces errors, speeds up record keeping, and provides accurate reporting.

Through this project, I gained practical knowledge of:

- Front-end development using C#
- Database design using MySQL
- System analysis and design diagrams
- Software development lifecycle and testing

The project improves daily workflow and creates a reliable system for future expansion.
